Thermoplastic Solutions High Performance

About the COMPANY

Since 1994, Tecnoperfil has stood out for offer innovative thermoplastic products, focusing on PVC. Completing three decades experience, the company creates solutions customized for construction, industry, services and hydroponic agriculture.

ISO 9001 certification attests to the commitment from Tecnoperfil with quality. This dedication not only strengthens customers' trust, but also opens up new perspectives of business.

The TECNO identity reflects the commitment Tecnoperfil's socio-environmental position as a company socially responsible.

Wall Protectors

The Vinylshock line is the pioneer in the Brazilian production of wall protectors, handrails and stretcher bumpers.

These are resistant, advanced-technology products that undergo rigorous quality, dimensional control and impact resistance tests.

They are protectors with an innovative and modern design, which offer practical and versatile solutions to protect and enhance environments.

Available in different models and colors, they are ideal for protecting walls, corners, access ramps, corridors and other surfaces, preserving their beauty and avoiding unwanted maintenance costs.

They can be installed on masonry walls, wood, concrete blocks, precast panels, steel structures and plasterboard.

Product for internal use.

Meets standards: ABNT NBR 9077 | ASTM C-21 | ASTM D-256
They comply with Anvisa's RDC n° 50.

Anyone who compares quality and safety chooses Tecnoperfil!

TEC 026 N WALL PROTECTOR | HANDRAIL

The TEC 026 N Wall, Handrail and Wall Protector offers a resistant and versatile solution to protect and enhance environments.

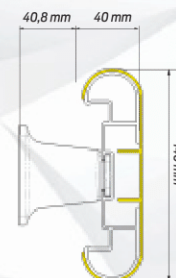

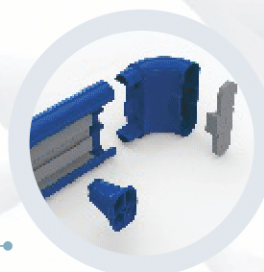

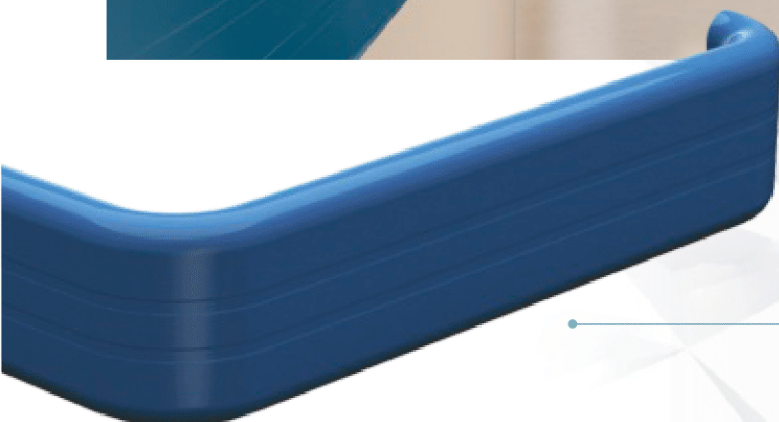

TEC 026 N can be applied in hospitals, clinics, schools, hotels, cinemas, theaters, concert halls and in other environments that require wall protection and hand support. LED* can be used internally (optional) for identification in environments with reduced lighting, such as hospital corridors at night, theaters and cinemas.

It has a PVC base, which is fixed to the wall with screws (supplied by Tecnoperfil).

** Electrical/electronic components and LED strips are not supplied by Tecnoperfil.*

Accessories also available: Finishing terminals, curves, splices and fixing support.

Product for internal use.

EXPANSION JOINT

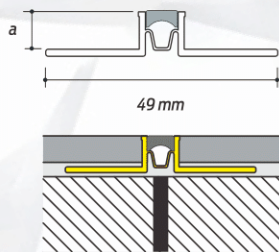

Expansion Joints are expansion joints for ceramic tiles installed with mortar.

They allow the system (mortar/ceramic) to move dilatometrically without suffering detachment or cracking of the ceramic and substrate. Its holes in the side flaps guarantee excellent fixation under compression and tension conditions.

Resistant and practical product, available in different colors and heights, for the most diverse technical needs.

Application is recommended every 32m², in internal areas, according to NBRs 13753, 13754 and 13755.

They are applied with mortar, under the floor, ensuring their firm and correct position, through the «T» grooves of the pieces.
